

Notice: Enhanced Inspection of the Initial Shipment of New LCD Modules for Line A

To all members of the Production and Quality Control Teams,

The initial shipment from the new LCD module supplier (secondary vendor) is scheduled to arrive at Line A on **Thursday, September 3**. Because the defect rate of this initial shipment must be compared with that of the existing line, please ensure that the following requirements are observed.

- Clearly identify the supplier in the designated supplier column of the inspection records for all products manufactured using the initial shipment.
- Increase the sample size for LCD staining and delayed touch response inspections to achieve coverage as close to 100% as possible.
- If a defect is found, immediately report it with a photo to Assistant Manager Doyoon Lee of the Quality Control Team.
- Enter the results in the consolidated inspection record file (A_Line_통합_검사기록.xlsx) on the same day.

This notice will remain in effect **until the initial shipment inspection is completed on Thursday, September 10**. Please contact the Quality Control Team with any questions.

Thank you.

Quality Control Team
